SECTION 08 43 29
SLIDING GLASS STOREFRONTS

PART 1 GENERAL

1.01 SUMMARY

A. Section includes furnishing and installing a single track, sliding thermally broken aluminum framed glass door, wall or storefront panel system that includes:
   1. Aluminum frame
   2. Tracks
   3. Threshold
   4. Sliding panels
   5. Swing panels
   6. Stacking bays
   7. Sliding-swinging and locking hardware
   8. Weather stripping
   9. Glass and glazing
   10. Insect screens (optional)
   11. Accessories as required for a complete working installation.

B. Related Documents and Sections: Contractor to examine Contract Documents for requirements that directly affect or are affected by Work of this Section. A list of those Documents and Sections include, but is not limited to, the following:
   1. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 General Requirements, Specification Sections, apply to this Section.
   2. Section 06 10 00, Rough Carpentry: Wood framing R.O. and blocking.
   3. Section 07 27 00, Air Barriers: Building wrap
   4. Section 07 62 00, Sheet Metal Flashing and Trim: Flashing and other sheet metal work.
   5. Section 07 90 00, Joint Protection
   6. Section 08 42 23, Glass Entrance Swing Doors
   7. Section 08 43 33, Folding Glass Storefronts: NanaWall SL60
   8. Section 08 51 13, Aluminum Windows: NanaWall SL68, tilt-turn, casement window,
   9. Section 09 22 16, Non-Structural Metal Framing: Metal framing R.O. and reinforcement.
   10. Section 10 22 43, Sliding Glass Partitions: NanaWall HSW60

1.03 ADMINISTRATIVE REQUIREMENTS

A. Coordination: Coordinate Sliding Glass Storefront system and framing R.O.

B. Preinstallation Meetings: See Section 01 30 00.

1.04 SUBMITTALS

A. For Contractor submittal procedures see Section 01 30 00.

B. Product Data: Submit manufacturer’s printed product literature for each Sliding Glass Storefront system to be incorporated into the Work. Show performance test results and details of construction relative to materials, dimensions of individual components, profiles and colors.

C. Product Drawings: Indicate Sliding Glass Storefront system component sizes, dimensions and framing R.O., configuration, sliding and swing panels, direction of swing, stacking layout, typical head jamb, side jamb and sill details, type of glazing material, handle height and field measurements.

D. Installation, Operation and Maintenance Data: Submit Owner’s Manual from Manufacturer. Identify with project name, location, and completion date, and type and size of unit installed.

NOTE: Delete the following Article if LEED is not applicable; edit to meet project LEED requirements.

E. Sustainable Design Submittals (USGBC LEED®): Refer to Section 01 81 15, LEED Design Requirements.

1. LEED 2009 (v3) Credits. Complete online LEED forms and submit other required materials as follows:

   a. Energy and Atmosphere (EA) Credits:
      1). EA Credit 1 (EAc1): Optimize Energy Performance: System

   b. Materials and Resources (MR) Credits:
      1). MR Credit 1.1 (MRc1.1): Building Reuse - Maintain Existing Exterior Walls, Floors and Roof
      2). MR Credit 1.2 (MRc1.2): Building Reuse - Maintain Existing Interior Nonstructural Elements

NOTE: MR Credit 3 below can apply to reusing salvaged Sliding Glass Storefront.

   4). MR Credit 3: Materials Reuse - 5% (MRc3.1) or 10% (MRc3.2)
      a). Submit percentage of products made from plant materials with a less than 10-year harvest cycle against the total value of building materials on the project.

   c. Indoor Environmental Quality (EQ) Credits:
      1). IEQ Credit 2 (IEQC2): Increased Ventilation - Case 2 - Naturally Ventilated Spaces
      2). IEQ Credit 8.1 (IEQc8.1): Daylight & Views - Daylight 75% of Spaces
      3). IEQ Credit 8.2 (IEQc8.2): Daylight & Views - Views for 90% of Spaces

2. LEED v4 for Building Design and Construction (BD&C) Credits. Complete online LEED forms and submit other required materials as follows:
a. Energy and Atmosphere (EA) Credits:
   1). EA Credit 2 (EAc2): Optimize Energy Performance

b. Materials and Resources (MR) Credits:

   NOTE: MR Credit 1 below can apply to reusing salvaged Sliding Glass Storefront.

   1). MR Credit 1 (MRc1): Building Life-Cycle Impact Reduction; Option 3 - Building and Material Reuse

c. Indoor Environmental Quality (EQ) Credits:

   1). EQ Credit 7 (EQc7): Daylight

   2). EQ Credit 8 (EQc8): Quality Views

      a). Submit calculations or measurements for occupant spaces to meet sound transmission class ratings between adjacent spaces and reverberation time requirements within a room.

F. LEED Closeout Documentation:

   NOTE: Edit below to meet project LEED requirements.

   1. LEED 2009 (v3). Submit completed LEED™ submittal Worksheet Templates for the following credits:

      a. EAc1, MRc1.1, MRc1.2, MRc2, MRc3, IEQc2, IEQc8.1, IEQc8.2

   2. LEED v4 (BD&C). Submit information and documentation to complete LEED™ Worksheet Templates for the following credits:

      a. EAc2, MRc1, EQc7, EQc8

1.05 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer capable of providing complete, precision built, engineered, pre-fitted units with a minimum twenty-five (25) years’ experience in the sale of folding-sliding door systems for large openings in the North American market.

   1. Manufacturer to have ISO 9001: 2015 quality management system registration.

   2. Manufacturer to have ISO 14001: 2015 environmental management system registration.

B. Installer Qualifications: Installer experienced in the installation of manufacturer’s products or other similar products for large openings. Installer to provide reference list of at least three (3) projects of similar scale and complexity successfully completed in the last three (3) years.

   1. Installer to be trained and certified by manufacturer.

C. Single Source Responsibility: Furnish Sliding Glass Storefront system materials from one manufacturer for entire Project.

1.06 DELIVERY, STORAGE, AND HANDLING

A. Comply with manufacturer’s instructions and recommendations, Section 01 60 00 requirements, and as follows:

   1. Deliver materials to job site in sealed, unopened cartons or crates.

      a. Upon receipt, inspect the shipment to ensure it is complete, in good condition and meets project requirements.

   2. Store material under cover in a clean and dry location, protecting units against weather and defacement or damage from construction activities, especially to the edges of panels.

1.07 FIELD CONDITIONS

A. Field Measurements: Contractor to field verify dimensions of rough openings (R.O.), stack storage area, [floor bolt socket locations] [[and threshold depressions to receive sill.]]
Mark field measurements on product drawing submittal.

1.08 WARRANTY

A. Manufacturer Warranty: Provide Sliding Glass Storefront system manufacturer’s standard limited warranty as per manufacturer’s published warranty document in force at time of purchase, subject to change, against defects in materials and workmanship.

1. Warranty Period beginning with the earliest of 120 days from Date of Delivery or Date of Substantial Completion:
   a. Rollers and Glass Seal Failure: Ten (10) years
   b. All Other Components Except Screens: Ten (10) years

   1). Exception: Five (5) years if NOT installed by manufacturer’s certified trained installer.

PART 2 PRODUCTS

2.01 MANUFACTURERS

A. Basis-of-Design Product by Manufacturer: NanaWall HSW60 by NANA WALL SYSTEMS, INC. (www.nanawall.com)

1. Substitution Procedures: See Section 01 20 00; Submit completed and signed:
   a. Document 00 43 25, Substitution Request Form (During Procurement), or
   b. Document 00 63 25, Substitution Request Form (During Construction).

2.02 PERFORMANCE / DESIGN CRITERIA

NOTE: Specify Low Profile Saddle Sills for resistance against wind driven rain.
Flush Sills and Surface Mounted Interior Sills have NO rating against wind driven rain.
Floor Sockets without a Sill do NOT have a water rating.
Weeps are to be drilled in the field by the installer to manufacturer’s requirements.
Air infiltration and water penetration testing results are only applicable if the unit matches the tested panel and unit size, direction of opening and type of sill.
Structural load testing results are only applicable for the test unit size and type of locking and rods.
Comparative analysis charts published by manufacturer shows which panel sizes, if any, meets the structural loading design pressures specifically required for the project. Check for limitations on the use of these charts in the jurisdiction of the project.
Forced entry testing results are only applicable for the test unit type of locking.
See manufacturer’s latest published data regarding performance.
It is expected that the installed system’s performance would be not more than 2/3rds of the following certified laboratory test data in accordance with AAMA 502.

A. Performance Criteria (Lab Tested):

1. Air Infiltration (ASTM E283): Low Profile Saddle Sill
   a. 0.3 cfm/ft² (1.5 L/s/m²) at a static air pressure difference of 1.6 psf (75 Pa) with
incorporated swing doors

2. Water Penetration (ASTM E331, ASTM E547): **Low Profile Saddle Sill**
   a. No uncontrolled water leakage at a static test pressure in:
      1). Units with Weepholes from **Middle** Channel: 2.92 psf (140 Pa)
      2). Units with Weepholes from **Inner** Channel: 6.0 psf (290 Pa)

   a. Load Structure: At 1.5 times design wind pressure with no glass breakage or permanent damage to fasteners or storefront components.
      1). Design Pressure Positive: 45 psf (2160 Pa)
      2). Design Pressure Negative: 45 psf (2160 Pa)

4. Forced Entry (ASTM F842): Meets Type A - Grade 40

5. Florida Product Approval - Wind Loading (Units with panel sizes up to 3'-7" inch (1.07 m) wide x 10'-0" inch (3.05 m) high) subject to manufacturer size chart: FL 25540.1

   NOTE: HSW60 Inswing and outswing systems are approved by the State of Florida. FL 25540.1
   Weblink is:
   https://www.floridabuilding.org/pr/pr_app_dtl.aspx?param=wGEVXqWtDqvxIdqd8byAkHrSsurjZz/McCwDwkwH7uDW6pJ50Bm0pA%3d%3d

6. Swing Panel - Operation / Cycling Performance (AAMA 920): 500,000 cycles

8. Project Wind Loads (ASCE 7): System designed to withstand 20.0 psf (958 Pa) core required positive and negative pressure as minimum loads normal to the plane of the wall as required by authorities having jurisdiction.

11. Air Leakage:

12. Condensation Resistance Factor (CRF):

   NOTE: The NFRC 100, 200, 400 and 500 ratings of the HSW60 Sliding Glass Storefront System meet Prescriptive Method requirements for U-factor, SHGC, Air Leakage and CRF of California Title 24, Chapter 3, Building Envelope Requirements.

   For the listing of Nana Wall product NFRC testing reports go to the following website http://search.nfrc.org/search/searchdefault.aspx; click on Door (Find Ratings for Door Products); click on the Search by Manufacturer button; click Manufacturers, scroll down to and click on Nana Wall Systems, Inc., and click on the Find Products button.

13. EPA Energy Star: Meets requirements

   NOTE: **Energy Star** values for DOORS with > 50% glass can be achieved through the use of specific glass units meeting the following requirements:

   - Northern & North-Central Region: ≤ 0.30 U-factor 0.40 SHGC
   - South-Central & Southern Region: ≤ 0.30 U-factor 0.25 SHGC

   **Energy Star** Air Leakage Rating Requirements (ASTM E283 in accordance with NFRC 400 or AAMA/WDMA/CSA 101/I.S.2/A440-11):

   - Window, Sliding Door, or Skylight: ≤ 0.3 cfm/ft² (1.54 L/s/m²)
   - Swinging Door: ≤ 0.5 cfm/ft² (2.56 L/s/m²)
14. Acoustic Performance

STC (Rw)

NOTE: Acoustical system STC and Rw ratings per ASTM E413 and DIN 52210-3 are from testing of full panel systems by an independent and accredited acoustical laboratory in accordance with ASTM E90-09 and DIN 52210-4 test procedure. A complete and unedited written test report is available upon request.

See manufacturer’s latest published data regarding performance.

a. [ System STC (Rw) 43 (43) with frame recessed and 1-9/16 inch (40 mm) double IGU, air filled, 8mm laminated and 8mm tempered glass ]
b. [ System STC (Rw) 32 (32) with 15/16” (24 mm) double IGU, air filled, 4 mm and 4 mm STC 32 tempered glass ]

c. [ System STC (Rw) 43 (43) with frame recessed and 1-9/16 inch (40 mm) double IGU, air filled, 8 mm + 8 mm STC 45 laminated glass ]
d. [ System STC (Rw) 41 (41) with frame recessed and 1-7/16 inch (36 mm) double IGU, air filled, 6 mm + 8 mm STC 43 laminated glass ]
e. [ System STC (Rw) 40 (40) with frame recessed and 1-1/4 inch (32 mm) double IGU, air filled, 6 mm + 6 mm STC 42 laminated glass ]
f. [ System STC (Rw) 38 (38) with frame recessed and 1/2 inch (12 mm) STC 39 laminated glass ]
g. [ System STC (Rw) 37 (37) with 3/8 inch (10 mm) STC 38 laminated glass ]
h. [ System STC (Rw) 36 (36) with 5/16 inch (8 mm) STC 36 laminated glass ]
i. [ System STC (Rw) 35 (35) with 1/4 inch (6 mm) STC 35 laminated glass ]

B. LEED Characteristics:

1. LEED 2009 (v3)
   a. EAc1: NanaWall systems using low U-Value designed double or triple IGU and thermally broken frames can provide significant energy performance.
   b. MRc1.1: NanaWall exterior glass wall systems, not demolished in a renovation project, are reused in the same location.
   c. MRc1.2: NanaWall interior glass wall systems, not demolished in a renovation project, are reused in the same location.
   d. MRc2: NanaWall cardboard shipping crates are made of 60% recycled material and are 100% recyclable.
   e. MRc3: NanaWall’s components easily disassemble and reassemble to “Use as salvaged... or reused materials.”
   f. IEQc2: NanaWall systems provide natural ventilation in the open position, assisting in the 90% required natural ventilation of occupied spaces of ASHRAE 62.1.
   g. EQc8.1: NanaWall glass wall assembly borrowed light brings daylight deeper into the floor plate.
   h. EQc8.2: NanaWall glass wall assemblies provide direct outdoor lines of sight.

2. LEED v4 for Building Design and Construction (BD&C)
   a. EAc2: NanaWall systems using low U-Value designed double or triple IGU and thermally broken frames can provide significant energy performance.
b. MRC1: NanaWall can be easily disassembled for salvage and reuse.

c. EQc7: NanaWall glass wall assembly borrowed light brings daylight deeper into the floor plate.

d. EQc8: NanaWall glass wall assemblies provide direct outdoor lines of sight.

C. Design Criteria:
1. Sizes and Configurations: As indicated by the drawings for selected number and size of panels, location of swing panels, and location of tracks and stacking bays.
2. Unit Operation: Adjustable sliding and swing hardware with top and bottom tracks;
3. Panel Configuration:
   a. [ Straight ]
   b. [ Segmented curve ]
   c. [ 90° angle turn/ open corner ]
   d. [ 135° angle turn ]
   e. [ Window/ door combination ].

NOTE: Sizes and Configurations: http://www.nanawall.com/products/hsw60/options

See manufacturer drawings for selected custom dimensions within maximum frame sizes possible as indicated in manufacturer's literature.

See drawings for selected number of panels and configuration.

4. Stack Storage Configuration:
   a. [ Remote pocket ]
   b. [ Jamb wall ]
   c. [ Behind swing door ]
   d. [ Straight wall ]
   e. [ Jamb wall pocket(s) ]

5. Mounting Type: Top-hung
6. Panel Type: Multiple unattached
   a. [ with Entry/Egress panel hinged to side jamb. ]
   b. [ with Entry/Egress panel convertible to sliding panel. ]

2.03 MATERIALS
A. Thermally Broken Sliding Glass Storefront Description: Standard top-hung, single-track, interlocking aluminum-framed sliding glass storefront system that can be pocketed when open and have a swing door hinged off a side jamb or within a sliding panel. Manufacturer’s standard frame and panel profiles, with head track, stacking bays, side jambs, sliding panels, and swing panels with dimensions as shown on Drawings.
1. Provide clear anodized aluminum head track with aluminum covers on both sides that match aluminum profile finish.
2. Panels and Frames:
   a. Panels
      1). Single lite.

NOTE: Single lite above is standard; other options below may require an upcharge.
Refer to manufacturer's size chart for glass panel sizes requiring the use of horizontal mullions.
2). [Multiple lites with horizontal mullion(s) at height(s) indicated from the bottom of the panel.]

3). [Single lite with simulated divided lites in pattern indicated.]

4). Panel Size (W x H): As indicated.

NOTE: Maximum W x H panel sizes up to 12'-0" by 4'-0" (3.660 m by 1.2 m). Panels over 10'-6" high require an intermediate horizontal mullion.

5). Rail Depth: 2-5/16 inch (59 mm)

6). Top Rail Width: 4-5/16 inch (110 mm)

7). Bottom Rail Width:
   a). 2-3/8 inch (60 mm) for sliding panel and 4-5/16 inch (110 mm) for swing panel
   b). [Manufacturer’s standard kickplate with height indicated.]

NOTE: Indicate kickplate height. Select height between 6 and 12 inches (152 and 305 mm) high.

b. Frames:
   1). Top Track Depth: 3-1/8 inch (80 mm)
   2). Top Track Width: 4-3/8 inch (111 mm)
   3). Side Jambs Width: 1-9/16 inch (40 mm)

Note: Select from the following Sill Types, edit to suit and delete those not meeting project requirements:

c. Sill Type:
   1). [Standard flush sill (thermally broken)]
   2). [Low profile saddle sill (thermally broken)]
   3). [No sill, floor sockets without a floor track]
   4). [Surface mounted interior sill]
   5). Sill Finish: Aluminum with a [clear] [dark bronze] anodized finish.

3. Aluminum Extrusion: AlMgSi0.5 alloy, 6063-T5 (F-22 - European standard)
   a. Thickness: 0.078 inch (2.0 mm) nominal
   b. Thermal Break: 3/4 to 15/16 inch (20 to 24 mm) wide polyamide plastic reinforced with glass fibers. Thinner or poured and de-bridged type thermal breaks not acceptable

4. Panel and Frame Aluminum Finish
   a. [Same (one-color)]
   b. [Different (two-color)]

NOTE: Select finish type below, edit to requirements and delete items not used.

c. Anodized (AAMA 611):
   1). [Clear]
   2). [Dark Bronze]

d. Powder Coat (AAMA 2604):
   1). Color as chosen from manufacturer's powder coating finish chart from
      a). [manufacturer's standard selection of 50 colors - matte.]
b). [ manufacturer's full RAL selection. ]
   i. [ High Gloss ]
   ii. [ Matte ]
   c). [ custom finish. ]

B.  Glass and Glazing:

   **NOTE:** Unlike wet glazing, NanaWall's standard dry glazing method helps reduce instances of seal failure.

   2. Manufacturer's [ tempered ] [ and ] [ laminated ] glass lites, dry glazed with glass stops on the inside.

   **NOTE:** Select and edit glass type(s) to meet building code, wind-load design, acoustic, bullet resistant and/or security, and other project requirements with other glass available from manufacturer.

   Contact NanaWall for availability of other commercial glass types.

   a. Glass Lite / Insulated Glass Unit (IGU):
      1). Single:
         a). 1/4 inch (6 mm) thick.
         b). [ 5/16” (8 mm) thick ]
         c). [ 3/8” (10 mm) thick ]
         d). [ 1/2” (12 mm) thick ]
      2). Double IGU:
         a). [ 15/16 inch (24 mm) thick. ]
         b). [ 1-1/4 inch (32 mm) thick. ]
         c). [ 1-7/16 inch (36 mm) thick. ]
         d). [ 1-9/16 inch (40 mm) thick. ]
      3). Triple IGU:
         a). 1-7/16 inch (36 mm) thick.

   **NOTE:** Subparagraphs below are options for Double and Triple IGU items above.

   b. IGU Fill:
      1). Air filled
      2). [ Argon filled ]
      3). [ Krypton filled ]

c. Glass Lite Type:
   1). Reduced iron

   **NOTE:** Items below are options and may require an upcharge.

   2). [ Low iron ]
   3). [ Solar bronze ]
   4). [ Solar gray ]
   5). [ Bird safe ]

d. Glass Spacers: Manufacturer's standard
1). [ gray finish with capillary tubes ]
2). [ dark bronze finish with capillary tubes ]
3). [ gray finish without capillary tubes ]
4). [ dark bronze finish without capillary tubes ]
e. IGU Surface:
   1). Clear
   2). [ Low-E coating on # 2 surface of double IGU ]
   3). [ Low-E coating on # 2 surface of triple IGU ]

C. Locking Hardware and Handles:

NOTE: Select one of the below Main Entry Panel paragraphs WITH or WITHOUT Swing Panels, deleting all others. Edit to suit project requirements.

1. Main Entry Panel(s) for Models WITH a [ Pair of ] Swing Panel(s): Provide manufacturer’s [ standard lever handles ] or [ lever handles with return ] on the inside and outside, and a standard lockset with a lockable latch and multi-point locking with a dead bolt and rods at the top and bottom on primary panel [ only ].
   a. Rods to be concealed and not edge mounted.
   b. After turn of key or thumb-turn, depression of handles withdraws latch.
   c. Lifting of handles engages rods and turn of key or thumb turn engages deadbolt and operates lock.
   d. Lever Handles - Finish:
      1). Brushed satin stainless steel
      2). [ Titanium black stainless steel ]

NOTE: Handles above are standard; other options below may require an upcharge.

Lever handle with return only available in "Brushed satin stainless steel."

   3). [ Oil rubbed bronze solid brass ]
   4). [ Satin nickel solid brass ]
   5). [ White solid brass ]
e. Locking:
   1). Standard profile cylinder
   2). [ Adapter for Small Format Interchangeable Core (SFIC) ]

2. Main Entry Panel(s) for Models WITH Swing Panel(s): Provide manufacturer’s push-pull handles with separate lockset and dead bolt.

NOTE: Option above is recommended with a door closer.

   a. Push-pull handles in a brushed stainless steel finish and stainless steel flat handles in a [ brushed satin finish. ] [ titanium black finish. ]

3. Main Entry Panel(s) for Models WITH Swing Panel(s): No hardware or locking provided by manufacturer; Field installed panic device by Section 08 71 00.

NOTE: Using panic device hardware by others invalidates manufacturer’s design wind-load pressure test.

4. Sliding Panel to be Opened First for Models WITHOUT a Swing Panel: Provide manufacturer’s standard L-shaped handle on the inside, flat handle on the outside and lock set with profile cylinder. Operation of lockset is by turn of key from the outside and with a
Guideline Specification

NANAWALL HSW60

©2019 Nana Wall Systems, Inc.

Thermally Broken Aluminum Framed Single Track Sliding System

SLIDING GLASS STOREFRONTS

1. Thumb-turn from the inside with a two-point locking hardware operated by 180° turn of the handle.
   a. L-Shaped Handles - Finish:
      1) Brushed satin stainless steel
      2) [ Titanium black stainless steel ]

   **NOTE:** Handles above are standard; other options below may require an upcharge.

2. Sliding Panel to be Opened First for Models WITHOUT a Swing Panel: Provide manufacturer’s standard flat handle on the inside and on the outside and a lockset with a profile cylinder. Operation of lock set is by turn of key from the outside and from the inside with a two-point locking hardware operated by 180° turn of the handle.

   **NOTE:** Key operation from the inside above may not meet egress requirements.

3. Main Entry Panel for Models WITHOUT Swing Panel: Provide manufacturer’s standard flat handle on inside only with concealed two-point locking hardware operated by 180° turn of handle.

   **NOTE:** Note that with the option above, the main entry panel is operable from inside only and that there is no latch.

4. Secondary Panels: Provide manufacturer’s [ standard flat handles ] [ removable custodial handles ] and concealed one or two point locking hardware operated by 180° turn of handle. Face applied flush bolt locking not acceptable.

   **NOTE:** Flat handles above are standard with removable custodial handles an option that may require an upcharge.

   a. Flat Handle - Finish:
      1) Brushed satin stainless steel
      2) [ Titanium black stainless steel ]

   **NOTE:** Handles above are standard; other options below may require an upcharge.

   3) [ Aluminum with powder coat finish and color to match frame. ]

   **NOTE:** Finishes to match are closest matches available by the manufacturer. Review for acceptability.

5. Handle Height: 41-3/8 inch (105 cm) centered from bottom of panel or as otherwise indicated.

6. Aluminum locking rods with fiberglass reinforced polyamide end caps at the bottom (and top on certain panels). Rods to have a stroke of 15/16 inch (24 mm).

7. Additional profile cylinders to be [ keyed alike. ] [ keyed differently. ]

8. Incorporated Swing Panel:
   a. Provide crank handle with pole to be stored in flap on panel stile to convert sliding panel to a swing panel and vice versa.
   b. Provide polyamide conversion box located on upper arm of top rail and circular cover profile located on pivot side of upper arm of top rail. Finish:
      1) Silver gray
      2) [ White ]
      3) [ Black ]
      4) [ Dark brown ]
   c. Swing Door Attachment: Geared positive attachment only to affix swing door to the frame for incorporated swing doors for ease of operation and rigid security.
d. Pinch Resistance: Provide rounded extrusions on pivot side of incorporated swing panels.

e. For the No sill, floor sockets without a floor track option, provide a stainless steel finish pivot box for socket.

D. Sliding-Swinging Hardware: Provide manufacturer's standard hardware.

1. For each sliding panel, provide two (2) two-three wheeled, sintered bronze (oil impregnated) unidirectional sliding panel carriers with a one wheeled, polyamide guide rollers that are attached to the panels with stainless steel rods.
   a. Maximum carrying capacity of two carriers on a panel to be 330 lbs (150 kgs).
   b. Provide on all four corners of sliding panels and incorporated swing panels, thermally broken, die cast zinc multifunctional corner fittings with carrier connectors, male and female locking receptacles, hinges and hinge pins as required.
   c. Finish: Powder coated, closest match to finish of frame and panels.

NOTE: Corner connectors are only available in powder-coated finishes. If anodized panel and frame finishes are selected, there may be aesthetic issues.

d. Adjustment: Provide system capable of specified amount of adjustments without removing panels from tracks.

E. Weather stripping: Manufacturer's double layer EPDM between panels and EPDM gasket, or brush seal between panel and frame, or brush seals with a two-layer fiberglass reinforced polyamide fin attached at both inner and outer edge of bottom of door panels with a recessed sill or on frame for sealing between panels and between panel and frame.

NOTE: The manufacturer's weather stripping is determined at the factory by the direction of swing, the panel configuration, the type of locking and the type of sill.

F. Fasteners: Stainless steel machine screws for connecting frame components.

2.04 FABRICATION

A. Extruded aluminum frame and panel profiles, corner connectors and hinges, sliding hardware, locking hardware and handles, glass and glazing and weather stripping components to construct sliding glass wall with stacking bays.

1. Each unit factory pre-assembled and shipped with all components and installation instructions.

2. Exposed work to be carefully matched to produce continuity of line and design with all joints.

3. No raw edges visible at joints.

2.05 ACCESSORIES

A. Provide sidelights, transoms, corner posts, or single or double doors as indicated.

NOTE: Screen ONE XL is 'non-pleated' while Screen Classic is 'pleated.' Select 'ONE XL' or 'Classic,' deleting option not chosen.

B. Insect Screen Panels: Fully retractable non-pleated screen made of ultra-strong, UV resistant fiberglass mesh housed in a single cartridge riding on a single track.

1. Basis of Design Product by Manufacturer: Screen ONE XL or an Architect acceptable equivalent subject to project requirements.

2. Finish - Aluminum Top Track, Side Jambs and Vertical Struts:
   a. White powder coated
   b. [ Black powder coated ]

NOTE: Above options are standard.
C. Insect Screen Panels: A series of top-hung collapsible pleated UV resistant fiberglass mesh screen panels riding on a single narrow ADA compliant 1/4 inch (5 mm) floor track. Each 4 inch (10 cm) wide vertical cassette can expand to 3'-3" (1 m) wide.

1. Basis of Design Product by Manufacturer: Screen Classic or an Architect acceptable equivalent subject to project requirements.

2. Finish - Aluminum Top Track, Side Jambs and Vertical Struts:
   a. White powder coated
   b. [ Clear anodized ]
   c. [ Dark bronze anodized ]

   **NOTE:** Above options are standard. Check with NanaWall regarding powder coated and other available finishes, which may require an upcharge.

   d. [ Powder coated with color as selected by architect. ]

3. Screen Track Stacking: [ Within opening ] [ Extended beyond opening ]

**PART 3 EXECUTION**

3.01 EXAMINATION

A. Examination and Acceptance of Conditions per Section 01 70 00 and as follows:

1. Carefully examine rough openings with Installer present, for compliance with requirements affecting Work performance.

   a. Verify that field measurements, substrates, tolerances, levelness, plumbness, cleanliness and other conditions are as required by the manufacturer, and ready to receive Work.

   b. Verify the structural integrity of the header for deflection with live and dead loads limited to the lesser of L/720 of the span or 1/4 inch (6 mm). Provide structural support for lateral loads, and both wind load and eccentric load when the panels are stacked open. Provide structural support for stacking bay.

   **NOTE:** Prior to installing NanaWall, it is recommended that all building dead loads be applied to the header. Allow a reasonable amount of time for the dead load’s effect on the header; only then can the building’s live load be used to meet the above requirements of L/720 or 1/4 inch (6 mm). If this is not done, both dead and live loads need to be considered.

2. Proceed with installation only after unsatisfactory conditions have been corrected.

3.02 INSTALLATION

A. General: Install Sliding Glass Storefront system in accordance with the Drawings, approved submittals, manufacturers' recommendations and installation instructions, and as follows:

1. Properly flash, waterproof and seal around opening perimeter.

2. Securely attach anchorage devices to rigidly fit frame in place, level, straight, plumb and square. Install frame in proper elevation, plane and location, and in proper alignment with other work.

3. When lower track is designed to drain, provide connections to allow for drainage.

4. Install panels, handles, lock set, screens, weather stripping and other accessories in accordance with manufacturer’s recommendations and instructions.

3.03 FIELD QUALITY CONTROL

A. Field Tests and Inspections per Section 01 40 00 of the following:

1. Verify the Sliding Glass Storefront system operates and functions properly. Adjust hardware for proper operation.
B. Non-Conforming Work: Repair or replace non-conforming work as directed by the Architect; see General and Supplementary Conditions, and Division 01, General Requirements.

3.04 CLEANING AND PROTECTION
A. Keep units closed and protect Sliding Glass Storefront installation against damage from construction activities.
B. Remove protective coatings and use manufacturer recommended methods to clean exposed surfaces.

END OF SECTION

DISCLAIMER:
Nana Wall Systems, Inc. takes no responsibility for product selection or application, including, but not limited to, compliance with building codes, safety codes, laws, or fitness for a particular purpose. This guide specification is not intended to be verbatim as a project specification without appropriate modifications for the specific use intended and the particular requirements of a specific construction project.
