

# A BUYER'S GUIDE TO NANAWALL SLIDING PATIO DOORS

NanaWall®  
Boundaries **Unbound**®

## Why NanaWall?

As the leading manufacturer of opening glass walls in North America and Canada, NanaWall continues to innovate design solutions for residential and commercial openings.

Offering more than just a conventional sliding patio door, NanaWall offers:

- NW MultiSlide 630 Sliding Glass Wall
- cero® Minimal Sliding Glass Wall

In addition to elevating the indoor-outdoor experience and increasing property value, our movable glass wall systems offer:

### **Durability and Performance:**

NanaWall sliding patio doors have been independently tested for air, water, structural, forced entry, operation, and sound control with excellent results.

**Certified Installers:** Hiring a NanaWall Certified Installer ensures that your NanaWall system will be installed correctly, quickly, and without hassle. Plus, this minimizes callbacks by getting it done right the first time.

**Security:** NanaWall systems are engineered with concealed locking rods and locks for optimal peace of mind and comfort. Our sliding doors have passed forced entry testing at accredited labs.

## Generation 4 MultiSlide Patio Door

Engineered for unmatched performance, Generation 4 opening glass walls elevate any space with features and benefits never before seen in the market—offering the smoothest operation, slimmest frames, and superior weather performance.

# Things to Consider When Selecting Sliding Patio Doors

## Height and Width

Depending on model selection, NanaWall sliding systems can achieve openings over 60 feet wide and up to 15 feet tall. Up to five or more tracks are possible with zero, and up to three tracks are possible with NW MultiSlide 630.

## Sills and Thresholds

Depending on your project's needs, choose from a variety of water-rated, barefoot-friendly, and ADA-compliant sills for smooth transitions.

## Aesthetics and Customization

NanaWall systems can be paired with convenient screens (by others). Additionally, our zero minimal sliding glass doors has an automation option (by others) for everyday functionality.

## Energy Efficiency

NanaWall sliding glass patio doors can be specified with double or triple glazing for optimal weather performance and energy efficiency.

A BUYERS GUIDE:  
NANAWALL SLIDING PATIO DOORS

# NW MultiSlide 630

This award-winning sliding door system offers expansive, floor supported, aluminum framed multislide panels that are thermally broken to deliver exceptional energy efficiency.

## System Highlights:

- Optional multidirectional panel operability allows users to open at the left or the right of the system based on daily needs.
- Slim vertical stile measuring 2 1/8" (55 mm).
- Barefoot-friendly, weather-rated Flush Sill design visually disappears with a level installation of the finished flooring.
- Built-in rattle-resistance features ensure quiet operation.
- Double and triple glazing options for optimal energy efficiency.
- Two-point locking mechanism and anti-lift feature for enhanced security and peace of mind.
- For unobstructed openings, configurations that store the panels in a pocket are possible.

## PERFORMANCE

Max Panel Height	11' (3350 mm)
Max Panel Width	6' 6" (1980 mm)
U-Value Minimum	.26

Customize your patio door with simulated divided lites, in the pattern of your choice, to create a modern steel look. The lites in steel effect sliding doors can also be coordinated across Generation 4 folding and window products.
